

Care and Maintenance for your Curbing

Tips for protecting your investment

It takes approximately 30 days for your curbing to fully cure. Follow these tips for the best outcomes.

The 1st 24 hours

- Keep pets and children away from the curbing.
- Do not try to pick or brush anything off of the curbing.
- Remember heavy rains and water may damage a curb for the first 24 hours, turn sprinklers off, and be mindful of hoses and pool backwash.
- Landscaping may start 24 hours after installation, take caution with shovels, picks etc.
- Do not run wheelbarrows over the curbing at this point.

Long term Care

- NEVER allow a tractor or vehicle to drive over the curbing, it can crack under this amount of weight.
- Over time the weather and sun can wear the sealer, keep it looking fresh by sealing the curbing every 2-3 years, or when needed.
- We offer re-sealing services, please call for an estimate.
